## PROFESSIONAL SUMMARY

A highly experienced Full Stack Developer with a decade of expertise in building and scaling complex web applications. Proven success delivering robust systems for diverse sectors, including healthcare, e-commerce, and enterprise clients. Expert in PHP, Laravel, and modern JavaScript frameworks, with a strong focus on performance optimization and efficient development practices.

## EXPERIENCE

### Software Engineer | Fastfwd Multimedia Ltd., Birmingham

*Apr. 2021 – Present*

- Refactor [Liberty Risk Reduce](#) platform serving thousands of companies, implementing performance enhancements and technology stack upgrades that improved system reliability.
- Maintained multiple client WordPress websites with 99.9% uptime, delivering monthly updates and technical support.
- Collaborated with EU country managers and team leads to achieve project success rate and meet all critical deadlines.

### Full Stack Developer | Bold Compass LLC., South Carolina, United States

*Mar. 2020 – Apr. 2021*

- Developed a secure containerized API for a translation tool with robust authentication and data protection.
- Built an admin dashboard for [GoRideRentals](#) from scratch, enabling efficient platform operations management.
- Delivered comprehensive insurance management system within four weeks, exceeding client expectations.

### Web Developer | BBO Co. LTD., Cebu City

*Jan. 2018 – Mar. 2020*

- Led a small team of developers partnering with sales stakeholders to deliver integrated sales dashboard and affiliate marketing platform.
- Engineered automation tool aggregating data from multiple e-commerce platforms (Rakuten, Amazon, EcShop), generating standardized daily sales reports.
- Built a healthcare appointment application for Japanese clients with a real-time clinic/hospital booking system.

### Web Developer | Bibo Global Opportunity, BGC

*Nov. 2015 – Jan 2018*

- Enhanced online English learning platform serving over 1 million users across Japan and Europe.
- Implemented comprehensive unit testing for legacy systems, reducing defects and improving code quality.
- Integrated third-party APIs (Google, Backlog, Slack) to automate workflows and increase operational efficiency.

---

## PROJECTS

**Maptasy Sports Platform** - Full-stack fantasy sports application combining GIS with strategic gameplay, featuring interactive map interface and real-time tournament scoring

**InvoiceMe** - A lightweight operations app for local service businesses (plumbing, electrical, cleaning, HVAC, pest control) to move jobs from lead -> quote -> approval -> invoice -> payment in one place.

**Employield** - A modern HR platform that empowers your team. Streamline employee management, time tracking, performance reviews, and learning—all in one powerful, intuitive platform.

---
